Work Experience

2022 - Present **Web & Mobile Developer** *freelance*

On my path I've been working on projects that involves mostly react applications and REST APIs, currently I'm able to do things such as giving a nice UI/UX, responsive interfaces, setting up the server, user authentication, online payments, databases and srr. Later I became curious and started developing mobile apps.

About Me

Full stack and mobile developer, fast learner, patient, constant and very perseverant person, good at finding solutions and well performed working with a team, always trying to learn new abilities to improve myself as a professional.
